Kenny got smacked in 2008 and realized that the US was the biggest bank out there, with covid , the cares act., etc. He could literally funnel billions of \$ from the US. He learned where Bernie had gone wrong.

u/Rensole refuses to look at any of this stuff because it scares him. He instantly brushes it off as Q anonymous without even looking at any of it. But if he did, he'd see that there's truth to what Ratio says.

Lmao now they have the automod set to delete comments that contain that scary Q anonymous word

OP gave this one the 🗑️⭐ emojis, meaning this ape locked in important info? Seems to echo that Bernie Madoff was the fall guy and there is more underneath.

360? Are you referencing ICD codes around Disorders of the Globe by any chance? Are our eyes deceiving us?
