61727054 Says Ken is Next

I know that you know what that number relates to Ken. I know that you have a plaque in your NY office with that on it. Actually..It's known that London, Chicago, New York all have 61727-054 cleverly placed and/or referred to.

61727-054 *bold move*

For the longest time you've done everything possible to exceed where they failed. For years now you've shared your goals and your ambitions when it comes to Citadel. To be the biggest you've gotta slay the legend. You've never shied away from letting those around you know what your aim is..what really fuels you everyday, every account, every trade. To be the king of Wall St. Bigger and scarier than the Wolf. A legend. A myth.

...A genius. Just like xXx did it but better. They got tired and worn out. You've always considered that their weakness. They were only able to keep it going for so long, you've always felt as though you could get away with it forever.

I must admit..you've been clever. You've taken what you learned and have adapted quite well. That was until you allowed two mistakes to be made.

I didn't catch it before in 2019 when I started to peek behind the curtains and peel back the layers. But I have now and day by day so do others. Just like you...plain sight.

The more I think about it and the more research that I do into the books, I can't believe that NO ONE outside a handful of others have recognized the patterns. But that's okay..because 🦁's are getting ever so closeclose. So many 🦁's are on the path, they just haven't stumbled upon the right trees and bushes. Yet.

{Insert Rozay} *I remember being blind to it Til the day I put my mind to it*

Funny how alumni networks have become so clutch over the past year(Fuck Covid, amirite?)..Without them how would some dumb ape be able to gain access to the Citadel Securities Department of Computer Science at a certain uni..🤔🤔🤔

jUsT me babooning but word on Sixth St. is that your frienemies on Congress Ave. are running out of leverage when it comes to that quiet little office in Austin.

Just a matter of tick tocks 'til the real show begins Ken. What's your move then?

Hmmph..maybe that's why my 10 piece Tendies order keeps coming up short and the last time I went through the drive through all I got left holding was a bag of dips...🤔

This comment doesn't sound good for apes who are eating up all the dips... please elaborate, cryptic if you must.

Just a reply to "This is a Wendy's".

Will we have real tendies made the same way they are now with the same amount of nutrients post squeeze?

This guy is ostensibly repeating something someone else said and doesn't have any answers for you, he just wants to make s*** posts about Wendy's now.

I am the OP. There are answers, and there's no way that I'd post them here for obvious reasons.

Just wanted to make sure Wendy's wasn't going to switch up the menu on us. If they do oh well.. there's probably a chain restaurant around the block. Not a fan of the Golden Arches, fries and ice cream are good though. Thank you, artmagic.

I am not entirely sure what's going on, but I feel as though this post is significant and part of history somehow... and I want to show my future children and grand children I was here.

This is some wild shit 😂 either he's the greatest story teller to ever live or he was close to ken at some point or a partner or going to be, maybe a friend of a student at that school who uncovered their shit or he did himself 🤔 crazy he just dropped off the face of the earth

[–] zeek432 2 points 1 months ago

Potential whistleblower maybe, don't think any one this big has came through yet..yet

[–] rmrthe5thofnov (deleted by user) 2 points 1 months ago

SEC has been setting all kinds of records for whistle blower payments this past week or so. Definitely was thinking OP could have been one of them. What ever happened, hope that 🐼 is doing well.

Could be nothing but 1 day after the dude goes dark madoff is dead and the next day news about big bank ceo's being hauled before congress in may? Not saying there is something there but it could be a possibility

permalink reddit cedit

[–] rmrthe5thofnov (deleted by user) 2 points 1 months ago

Yeah, definitely a possibility, but hopefully not the case.

Saw this on the University of Texas In Austin website. Looks like the computer science is invested by Citadel?

[permalink](#) [reddit](#) [ceddit](#)

[–] RatioAtBlessons 8 points 2 months ago

It's a "department" at UT. Like a direct source of recruiting.

[permalink](#) [reddit](#) [ceddit](#)

[–] Poodogmillionaire 2 points 2 months ago

What is he referring to though, why does that connection have significance?

[permalink](#) [reddit](#) [ceddit](#)

[–] GMEJesus 4 points 2 months ago

There's a connect at the UT biz school to the server of Citadel's that has ALL their transactions. Some ppl have seen into the black box

[permalink](#) [reddit](#) [ceddit](#)

[–] Atraxxa 1 point 1 months ago

Citadel has access to an enormous amount of data that they probably are using to train machine learning algos. I'm wondering if UofT was affected by the backdoors and the waves of hacks. This could have been a way in for any curious observer to monitor their activity.

Nicolai Meinshausen is the brain behind it all.

[permalink](#) [reddit](#) [ceddit](#)

[–] DrinkDrPepperSpray 2 points 1 months ago

> Quantitative trading firms like Citadel Securities have access to unparalleled amounts of data," said Meinshausen, who was formerly a post-doctoral fellow at Berkeley and a professor of statistics at Oxford. "This presents immense opportunities for the application of machine learning and advanced statistical analysis."

I don't know you..but I like you. If you were able to pull that out or were lead to that name from anything in my post(s)..As far as I am concerned..you don't need to post or comment anything further for me to grasp what you've learned on your own. (But please do post or comment anytime)

The OP had a countdown 360.5. Was todays date 360.0?? If this was all connected we're in something so much bigger than we think. *Puts bigger tinfoil hat on** the number was Madoff's prison number, did he have the secret??

Yes! They have a partnership with them. Hey also opened offices in 2019 in Austin, where they do top of the art AI and machine learning. I wouldn't be surprised if this has anything to do with crypto

Well, as of today - 4/22/2021, Ken will have an opportunity to blame everything on Joe. Ken says it's all because of the capital gain tax.

Elon and Rogan? The Austin tech boom? Why Californians are leaving and moving to the South in droves. Why Austin is one of the only cities in the country where rent went *up*. Texas is a tax haven, with tons of smart, but dirt poor people who need jobs? And the leaders are dumb as dirt, have a chip on their shoulder, and have trees fall on them? Plus money grows on gooey black underground trees down there. Abbott literally sued Austin for it's mask mandate, preventing people from going back to work? Are Texans in debt the ones who are paying back the US's debt with their labor? Are the governor and Ken old school confederates, looking to go back to a simpler, more violent time?
