[/u/RatioAtBlessons](#), tin foil hat theory : Elon Musk is going to announce a partnership between Dogecoin, Gamestop and Tesla during SNL, or just a straight investment in Gamestop during SNL, triggering the MOASS. Thought?

Image deleted. Repost or share the info here? How did you get to ATI?

Holy shit, what level of genius are you? How did you come up with this?

Edit: who is Dr Ati? Could it be [ATI](#)?

The acquisition of ATI in 2006 was important to AMD's strategic development of its Fusion generation of computer processors, which integrated general processing abilities with graphics processing functions within a chip.

AMD took over ATI, and we're talking about companies that handle processing, which is a crucial need for running HFT.

Stop. 🖐 Buying. 🖐 \$800 Calls 🐼 🖐 That is a tactic that is being used against you because it's widely known that the majority of 🐼's buying Calls have no idea how options work. Not that you are too smooth 🧠 to figure it out. It's that the MAJORITY % of 🐼 simply do not understand.

If you open a TD account you get access to all of the education center and live advisors. That's the best way. Avoid YouTube videos by some guy who made \$10k last week. He did, YOU WON'T. And if you do, you got lucky..that week.

Free Venmo "tips"...

-Open that paper account on TD to trade options.

-Setup multiple monitors do what you already know how to do with stonks while learning how to ROLL OPTIONS.

-Pick any ticker to learn how to trade options on •ahem• GME

-Watch/Record Options Action and the TD Options exclusive shows

-Learn how to setup your trading platform..it's a critical step that people overlook

-In your paper account mimic those trades and keep a spreadsheet or a notebook if you prefer writing

-Learn the terminology for different strategies and when/how they apply

-Build up your knowledge on how things like GAMMA work

-Force yourself to avoid "testing" with real money. Think about it..a paper loss can be refreshed..a real loss is a REALIZED LOSS.

-Don't feel rushed! If you can 💎👶 and have been your GME, you can take some time to learn how to NOT blow up your account..because options can/will blowup your account. Loss porn is fun to look at..but endure. Remember that.

-Build your confidence and when you are ready, have experienced enough losses to the point that you are steadily making gains..steadily make gains and those gains are making gains..start with 1 SINGLE Contract that your research and DD screams out to you. Hint: It won't be the \$800 Calls and you'll know why.

Until you do any of that..put any of that work in..you're just a mark. An easy target. Easy money to those who won't feel bad eating off of your plate while smiling in your face.

Edit: Not directed at you [u/Radio90805](#)

The \$800 call yolo posts on wsb were probably used as bait, instructed by their bosses who are selling \$800 calls used to finance upcoming margin calls and shorting

Yeah they're smokin dickkk if they thought I'd grab one when they literally went straight from 115 to 800 overnight. They went far enough out so that the cheap options would be damn near impossible
