"NFA is the industrywide, self-regulatory organization for the U.S. derivatives industry, providing innovative and effective regulatory programs.

Designated by the CFTC as a registered futures association, NFA strives every day to safeguard the integrity of the derivatives markets, protect investors and ensure Members meet their regulatory responsibilities."

Oddly enough founded in 1982 and HQ in **Chicago**.

CPO and CTA members.

As our industry continues to digest and adapt to profound regulatory changes and as further opportunities and challenges present themselves, I am confident I possess the skill, experience, vision, and discipline to help the NFA further its mission of safeguarding market integrity, protecting investors, and helping members fulfill their regulatory responsibilities.

I am guided by two key principles:

- Our markets should be **safe, fair, efficient, competitive, and accessible** to all
- Regulation that is **thoughtful, well-calibrated**, and applied in a **streamlined and proportionate** fashion can help achieve these goals.

At Citadel, I manage our firm's engagement with legislative and regulatory initiatives impacting the financial industry globally, including the Dodd-Frank Act in the United States and EMIR and MiFID II in Europe. I meet frequently with policymakers and regulators in the United States and Europe to discuss concerns with proposed legislation and regulation to ensure that our financial markets are fair, efficient, competitive, and transparent.

I have testified before the House Agriculture Subcommittee on Commodity Exchanges, Energy & Credit and presented before the CFTC's Energy and Environmental Markets Advisory Committee, Market Risk Advisory Committee, and Technology Advisory Committee. Previously, I served as Chair of the Managed Funds Association's Derivatives and Swaps Committee and I actively participate in a number of MFA, AIMA, SIFMA AMG, FIA, and ISDA committees.

Before joining Citadel, I was an Executive Director at UBS Investment Bank, where I led UBS's US financial regulatory reform team. I spent the early part of my career in Hong Kong, working in both investment banking and trading roles. Raised in Downers Grove, Illinois, I graduated from Downers Grove South High School in 1997 and Princeton University in 2001.

My skills and experience will enable me to advance the interests of NFA's CPO and CTA members in the following areas:

- **Clearing Access and Costs:** The ability to efficiently access markets depends on a healthy and diverse clearing ecosystem. Unfortunately, certain well-intentioned post-financial crisis reforms and other headwinds have disproportionately raised the cost of client clearing and decreased client clearing capacity, particularly for smaller customers. Vigilance is needed to ensure that there is fair and

Chat

Search

- **Capital Requirements:** Minimum capital requirements are neither necessary nor appropriate for CPOs or CTAs. While the protection of customer assets is paramount, there are other existing legal protections and operational controls that can achieve the objective.
- **Modernizing Reporting and Recordkeeping:** NFA's antiquated filing system should be updated to make it more user friendly and the filing process less cumbersome. CFTC recordkeeping requirements should be modernized to be compatible with current technologies and adaptable to future advancements.
- **Position Limits:** Any expansion of Federal position limits to a given commodity future should only be implemented after a specific necessity finding is made, and only in a measured and appropriately calibrated fashion that preserves price discovery, market liquidity, and hedging needs.
- **Clearinghouse Resiliency:** The integrity and stability of clearinghouses are the bedrock on which our markets are built. Diligence is required to ensure that clearinghouses are well-governed, safe, sound, and resilient. However, further measures in this area should not increase costs for investors today or inappropriately shift the financial burden of a clearinghouse failure onto investors in the future.
- **Redundant Registration and Costs:** The removal of a widely used CPO registration exemption in 2012 triggered a redundant and extremely burdensome requirement for certain firms to dually register with the CFTC and SEC. The removal of this exemption should be revisited to ascertain whether it has achieved its policy goals and yielded any benefits that outweigh its attendant costs. At a minimum, regulation of, and reporting requirements for, dual registrants must be better coordinated, streamlined and rationalized.

Thank you for your consideration. I look forward to representing you on the NFA Board. Please do not hesitate to reach out if you have any questions or items to discuss.

So all the money from the multi-entity (MS, GS, Citadel etc) naked shorting scheme has been laundered into the Texas properties which in another comment you spoke on as being purchased en masse not by people at Citadel, but under Citadel's name itself.

Beth Van Duyne beats out Kenny Marchand in Nov 2020 to win Marchand's seat in Texas' 24th District. Marchand had held this seat for 40 years until Van Duyne beat him out, and she came directly from the Department of Housing and Urban Development (HUD), where she worked on rebuilding areas of Texas that were devastated by 2017's Hurricane Harvey (which caused 125 billion in flooding damage in Houston (ie. Deep In The Heart of Texas)). Marchant also used to be a home builder, I don't know going down a rabbit hole now.

Has anyone talked about the CLOs yet? (collateralized loan obligations, which are type of CDO, dog shit wrapped in cat shit) because there is a link between Goldman and citadel going back to 2005 of them working together with them.

Apparently CLOs can be used to hedge against inflation, but also are vulnerable to rises in interest rates because they are backed by floating rate loans.

Is that Mike Milken of Drexel fame? Lol. Did you know he spoke with Dan Schumann in 2019 at the Montgomery Summit? Trump pardoned this asshat in 2020. Republican roots running deep in this shit. Lots of UT Austin TX, real estate, art being purchased to hide \$\$\$ from others (ex wives?), and people killings themselves on others front lawns. WTF is going on in America?

Don't look too far, imho. Second para mentions UT again. The rest seems to be in italic because it represents lyrics? Loved you earlier summarizing conclusion.

Just now I am tingling with anticipation of further news on the UT and the real estate part of this story. Just so my tinfoil hat will become fashionable.

The rest? Not so much, because of the market wide consequences.

God damnit they killed Bernie! Wait that's not how the South Park phrase goes. Who's the one one always getting killed in that show? Maybe he decided to do a little sum sum of his own.

[Former Rep of Texas 24th District. Meet Kenny!](#) Appears that Kenny Merchant was one of the wealthiest members of Congress, [assets](#), [source](#)? He also served on the Committee on Financial Services during the 111th and 110th Congress, so 4 years. No doubt he has ties to many in Texas, both government and business.

"As long Ewell had a seat all was easy peazy...wash, rinse, and repeat...all across the Great State especially those Deep In The Heart. 59 times in around Alright, alright, alright."

59 times could reference FINRA's regulatory events of Citadel Securities LLC? Pure speculation, but Kenny could have been involved in some way with some of those FINRA regulatory events from 2007 - 2011?

Not sure about the Alright, alright, alright reference. But that's definitely Matthew McConaughey, Dazed and Confused.

Man all your post have definitely sent me down the rabbit hole. I find it super sus that Madoff just decides one day to confess. Even the federal prosecutor said "I've never walked into court on an arrest with simply the defendants confession." Also found this very interesting "Some of the systems that Madoff created, like "payment for order flow," which many experts contend is tantamount to a kickback and borderline fraud, is now the primary way trading apps like Robinhood make their money."
