**61727054 Says Ken Is Next****Shitpost**

61727054 Says Ken is Next

I know that you know what that number relates to Ken. I know that you have a plaque in your NY office with that on it. Actually..It's known that London, Chicago, New York all have 61727-054 cleverly placed and/or referred to.

*61727-054 bold move*

For the longest time you've done everything possible to exceed where they failed. For years now you've shared your goals and your ambitions when it comes to Citadel. To be the biggest you've gotta slay the legend. You've never shied away from letting those around you know what your aim is..what really fuels you everyday, every account, every trade. To be the king of Wall St. Bigger and scarier than the Wolf. A legend. A myth.

...A genius. Just like xXx did it but better. They got tired and worn out. You've always considered that their weakness. They were only able to keep it going for so long, you've always felt as though you could get away with it forever.

I must admit..you've been clever. You've taken what you learned and have adapted quite well. That was until you allowed two mistakes to be made.

I didn't catch it before in 2019 when I started to peek behind the curtains and peel back the layers. But I have now and day by day so do others. Just like you...plain sight.

The more I think about it and the more research that I do into the books, I can't believe that NO ONE outside a handful of others have recognized the patterns. But that's okay..because 🦑's are getting ever so closeclose. So many 🦑's are on the path, they just haven't stumbled upon the right trees and bushes. Yet.

{Insert Rozay} *I remember being blind to it Til the day I put my mind to it*

Funny how alumni networks have become so clutch over the past year(Fuck Covid, amirite?).Without them how would some dumb ape be able to gain access to the Citadel Securities Department of Computer Science at a certain uni..😊😊😊

jUsT me babooning but word on Sixth St. is that your frenemies on Congress Ave. are running out of leverage when it comes to that quiet little office in Austin.

OP - is the implication that:

- Citadel is colluding with others to hide fraudulent transactions in their normal operations • Madoff had legitimate brokerage arm of his firm (citation please), in addition to the Ponzi scheme. This made it harder to detect and gave it an air of legitimacy. • Citadel is using their status as market maker to provide the same "legitimate" cover... • ...but instead of a normal Ponzi scheme where disbursements which eat away at capital... • Citadel has a more sophisticated scheme (albeit relatively structured) involving shorts, FTDs, and moving capital around to make their assets and positions appear larger than they materially are. • OP is implying Ken made 2 mistakes: 1 in relation to Austin, TX; the other of a cyclical nature that a few apes have mentioned but haven't caught wider attention yet • Moving operations to Austin (or having a datacenter there) is disadvantageous in the field of nanosecond trading; NYSE is a preferred base of operations... • ...but the reason for moving to Texas might be one of the "tells" of the crime - less aggressive or knowledgeable prosecutors (NY has robust financial place, TX less so; TX also has an AG under serious investigation for corruption), k

Chat

Search

that Citadel has in Austin. • Several other competitors that are "in on the fix" have data centers in the same location... • ...the kind of record keeping that you can't make go away. There is evidence there. Most likely evidence of some "original sin" (2019 per OP's post) - but also something related to ongoing cycles, a dead giveaway just like a Ponzi scheme has a dead giveaway in their portfolio or RoR. • But for Citadel & co-conspirators, executing this scheme requires leverage and/or a base amount of cash for all parties to keep playing. But that leverage looks like it's drying up...

OP - is this the framework? I can speculate additional details on confirmation.

Another clue

RatioAtBlessions OP · 2m

That is until those mistakes made begin to be exposed by overly shorting a company, a billionaire likes that company and invests. Followed by "dumb money" retail traders who not only hold but they continue to buy no matter what. Fucking up your(Citadel and others) infinite money glitch.

You're pushed to the brink of significant losses and go you beyond doubling down by using an overly eager new blood on Wall Street who wants to sit at the big boys table do the unthinkable and pull the strings on buying as cover.

It's not about losing billions at this point, it's about protecting illegal activities and corruption.

How can all of this be proven? The data centers. If the SEC goes after those..it's over for Citadel and anyone involved.

Oops..I spoke too much. *yawns* I mean...

189 Reply Share Tip

sydneyfriendlycub · 2m

Also they overestimate the power of something so simple that is stopping one little (hold) to stop their ability to move the wheel.

They are shorting the treasury, betting against the system, getting too deep and too greedy and it's going to come to a stop.

Data centers are the source. They will get there, they are as slow and retarded as most apes, they will get there. Hope not too late.

Does this have any significance?

2

Reply Share

...

BoriOno · 1m

I believe it is in that it shows how tangled Citadel's web is and further proof that they wanted to "pull the strings"- as they are doing now. For visibility:

"Citadel Securities is one of the world's leading "market makers" — meaning a company that quotes both a buy and a sell price for a trade, hoping to make a profit on the spread — and the **proposed acquisition would make Citadel Securities the largest designated market maker, or DMM, on the New York Stock Exchange, with domain over trades for more than half of all securities listed on the exchange.**

Chat

Search

— had to approve the deal. That followed in due course, and according to a Citadel Securities [press release](#), the acquisition of IMC was finalized on Nov. 18.

As it happens, **Kelly Loeffler's husband, Jeffrey Sprecher, is chairman of the New York Stock Exchange** — as well as founder and CEO of Intercontinental Exchange (ICE), the company that has owned the exchange since acquiring it in a \$10.9 billion deal in 2013. Loeffler herself sits on a Senate committee that oversees Wall Street and the financial markets."

Has the post changed? Can't believe I'm back reading this at midnight. Who needs sleep?

1 ...

sydneyfriendlycub · 2m

From what I've been reading and digging, this is also related with what Michael Burry has been warning recently.

The treasury has been shorted. They are using bonds instead of cash as collateral liquidity.

Citadel Owns Palafox (controlled, managed and owned by different branches of citadel in the Cayman Islands) and basically it's a EPO maker.

The whole house of cards will collapse the actual treasury and that's why DTCC now is getting his hands on the business and starting to margins call.

[https://www.reddit.com/r/GME/comments/mgucv2/the\\_everything\\_short/?utm\\_source=share&utm\\_medium=ios\\_app&utm\\_name=iossmf](https://www.reddit.com/r/GME/comments/mgucv2/the_everything_short/?utm_source=share&utm_medium=ios_app&utm_name=iossmf)

This post explains it perfectly and deep in the rabbit hole. We are close apes!

sydneyfriendlycub · 2m

I've known this since day one, I read Michael burry on 2020 and once again he was right, he's cursed by people not listening which is sad. But he also predicted and warn about the treasury being shorted and got the SEC on his house as result.

Gotta remember that stocks were at/near all time lows when Covid first hit.

🤔 Buy low/Exit at all time highs/Short companies into bankruptcy that you think are vulnerable.

No. Not that I or others are aware of. That's a little far and doesn't exact<sup>ly</sup> Covid was/is a global issue that I don't believe anyone expected.

UT has the 2nd largest Endowment Fund c. \$39Bn

University of Texas Investment Management Company (UTIMCO) operate fund..

2019 saw start of 'Strategic Partnerships' reported in their 2020 Annual Report for the fund..

Guessing there'll be a link here ;-)

holy shit, what the fuck is this 🚀🚀🚀

2

sydneyfriendlycub · 2m

Dude, is this related to what is happening the snipping in nanoseconds so stop the price going upwards? Is this related to the Chicago nasdaq exchange and the problems involved high speed trading?

2

themith2019 · 2m

At some point there had better be a full data dump in the clear so that the wrinkly brains can dissect it.

I would hate for something with this potential to go the way of the Panama papers

2

Signal-Woodpecker361 · 1m

Causality is cyclical in this case it seems

2

hungryrhinos · 1m

Here for the history books

His Harvard alumni network may be tight knit..but not all are tight lipped and nothing like the reach and extension of other alumni networks.

Your sleuth work on the background and bio aren't accurate.

Your stabs however...★★★★★

Salute to you ape. Thanks for calling.

..When we come back from break, we'll do a deep dive into the highly controversial topic of dress codes on the moon. Are shoes required? You won't want to miss.
