61727054

61727054 Says Ken is Next

I know that you know what that number relates to Ken. I know that you have a plaque in your NY office with that on it. Actually..It's known that London, Chicago, New York all have 61727-054 cleverly placed and/or referred to.

61727-054 *bold move*

For the longest time you've done everything possible to exceed where they failed. For years now you've shared your goals and your ambitions when it comes to Citadel. To be the biggest you've gotta slay the legend. You've never shied away from letting those around you know what your aim is..what really fuels you everyday, every account, every trade. To be the king of Wall St. Bigger and scarier than the Wolf. A legend. A myth.

...A genius. Just like xXx did it but better. They got tired and worn out. You've always considered that their weakness. They were only able to keep it going for so long, you've always felt as though you could get away with it forever.

I must admit..you've been clever. You've taken what you learned and have adapted quite well. That was until you allowed two mistakes to be made.

I didn't catch it before in 2019 when I started to peek behind the curtains and peel back the layers. But I have now and day by day so do others. Just like you...plain sight.

The more I think about it and the more research that I do into the books, I can't believe that NO ONE outside a handful of others have recognized the patterns. But that's okay..because 🦍's are getting ever so closeclose. So many 🦍's are on the path, they just haven't stumbled upon the right trees and bushes. Yet.

{Insert Rozay} *I remember being blind to it Til the day I put my mind to it*

Funny how alumni networks have become so clutch over the past year(Fuck Covid, amirite?..Without them how would some dumb ape be able to gain access to the Citadel Securities Department of Computer Science at a certain uni.. 😳 😳 😳

freedomfor-thepeople · 1m

Hey i saw you read thought some of what he wrote made sense. In [u/ratioatblessions](#) answer to [u/gmetothemoon](#) it was noted that the spelling of Griffin was Ken griffth. Could it be intentionelso i thought to google some answers.

I found this https://en.m.wikipedia.org/wiki/Ken_Griffiths

This was not something I thought was relevant and then I remember the newly formed super league.... could it be related?

Further ken griffth died few days apart from his teammate and both weeks from the financial crisis in 2008...

It could be a coincidence and I know I sound like a tinfoilhat but I thought you maybe could look into it? Maybe even ask other apes

...

SonOfTheSun333 · 2m

I'm glad you asked because I hadn't looked into this earlier and it's not groundbreaking information but all the numbers in the number '61727054' add up to 32.

32 is the highest degree of Freemasonry that you can obtain through study alone. Above 32 is the 33+ degrees of the Supreme Council (Scottish Rite, one of the most influential and powerful branches in Freemasonry). You can only be hand selected by members of the Supreme Council, it cannot be obtained through study alone.

Skull and Bones' number is 322 - <https://www.youtube.com/watch?v=gwJDs1cg9Eo> - the interviewer of whom asked those questions to Bush & Kerry died of a sudden heart attack. Unrelated but still curious and fishy. The CIA have a heart attack gun by the way. And that's just the tech they've admitted to having, so...

In numerology you typically want to keep reducing the numbers so $6+1+7+2+7+0+5+4 = 32$ and you would then want to add 3+2 again and you get 5. Which may or may not have any more significance considering 5 has many meanings attributed to it in Numerology. This is just 1 of the articles that goes into detail about the number 5. May or may not have significance. I'm just throwing out info.

Madoff died on 4/14 which = 9. I would've considered this to be more of a coincidence if he died at the age of 81 because that would've been two 9s. 9 has one of the highest significant meanings in Numerology. If you add up the days between his birth and death (and count the day he died as the last day) you get 30302 days. If you read that without the 0's you get 33 + 32 which is actually quite significant to me considering his cell # equaled 32 and the fact that we see a 33 (next degree above 32 in Freemasonry) in that number as well. I'd be curious to find out if he was a Freemason.

Anyway, that's just my conspiracy mind rambling and could very well mean nothing. There's probably way more that can be dug up but that's a good start, I guess. Some odd numerical "coincidences" in there at first glance.

Switzerland

Business Wire

NEW YORK -- September 23, 2019

Citadel Securities, a leading global market maker, today announced that award-winning statistician Nicolai Meinshausen has joined the firm as Senior Fellow and Head of Principal Research. Nicolai's arrival coincides with the opening of Citadel Securities' newest office in Zurich, Switzerland, which will serve as another research and innovation hub for the firm. Zurich is the firm's first office in continental Europe and the latest addition to its growing global footprint, which spans Chicago, New York, London, Hong Kong, Toronto, Shanghai, Sydney and Dublin.

Nicolai's hire comes as Citadel Securities continues to invest in top technology talent to support its growing global trading platform. The firm added legendary computer scientist and UNIX pioneer Stuart Feldman as a Senior Advisor earlier this year.

Nicolai has been advising Citadel Securities since 2013 and was most recently a Professor of Statistics at ETH Zurich, where his research focused on causality, high-dimensional data and machine learning. In his new role, he is responsible for helping accelerate the growth of the business by leveraging state-of-the-art statistical analysis and machine learning research to further optimize trading across numerous asset classes.

"Nicolai is a leader in the field of statistics and an example of the type of talent that we want to attract to our exceptional team of technologists, data scientists, engineers and quantitative researchers," said Peng Zhao, CEO of Citadel Securities. "Having worked with Nicolai over the past several years, I am confident that he will bring tremendous value to our team as we continue to further our mission of creating the fairest, most transparent and efficient markets in the world."

Nicolai earned his Bachelor's degree in physics and Ph.D. in mathematics from ETH Zurich and a Master's degree in applied and computational mathematics from the University of Oxford, where he also later served as a Professor of Statistics. He was also a Postdoctoral Fellow at the University of California, Berkeley.

He has received numerous prestigious awards and fellowships, including the COPSS Presidents' Award, which recognizes individuals under the age of 41 who have made outstanding contributions to the field of statistics and a coveted fellowship from the Institute of Mathematical Statistics in 2016. Additional awards include the IMS Medallion Lecture (2015), and the Royal Statistical Society's Guy Medal in Bronze.

"Citadel Securities has a culture of passionate curiosity and analytical rigor, which creates an ideal foundation for innovative thinking and aligns well with my background as an academic and researcher," said Nicolai. "I look forward to working with this incredibly talented team as

Citadel Securities is a leading global market maker that trades in 35+ countries around the world and provides liquidity in a variety of products across fixed income, equities, derivatives, ETFs and FX. Citadel Securities is a top equity and options market maker in the U.S., trading over 40% of retail equity volume and 20% of total U.S. equity volume every day. The firm is also the #1 Designated Market Maker on the New York Stock Exchange, where it is responsible for trading the shares of more than 1,400 listed companies and plays a key role in managing trading during the IPO process. The firm has served as the DMM for a number of recent high profile transactions, including the direct listings of Spotify and Slack Technologies, and the IPO of Uber.

About Citadel Securities

Citadel Securities is a leading global market maker, delivering a broad array of fixed income and equity products to banks, broker-dealers, government agencies, corporations, insurers, and sovereign wealth funds. Through innovation and efficiency, the firm provides liquidity with the goal of driving price discovery in more than 35 countries and making markets more competitive, open, and transparent. Since its founding more than 15 years ago, Citadel Securities has cultivated a culture of excellence, assembling the brightest minds in trading, technology, and the sciences to make better markets for a better world.

Elon and Rogan? The Austin tech boom? Why Californians are leaving and moving to the South in droves. Why Austin is one of the only cities in the country where rent went *up*. Texas is a tax haven, with tons of smart, but dirt poor people who need jobs? And the leaders are dumb as dirt, have a chip on their shoulder, and have trees fall on them? Plus money grows on gooey black underground trees down there. Abbott literally sued Austin for it's mask mandate, preventing people from going back to work? Are Texans in debt the ones who are paying back the USs debt with their labor? Are the government old school confederates, looking to go back to a simpler, more violent time?

people have been wanting to move to austin for a while . in 2015 i went there to see about moving, and they were already sick of out of towners moving in . welcome to visit, just go home eventually was the vibe around town

1 Reply Share ...

Robert_P226 · 1m

It isn't just ATX, it is ALL of TX. Y'all want to visit? Outstanding. Pick up your trash, please. Then feel free to go back home, wherever that may be. East coast/West coast/Northern politics not so welcome (THOSE economic standards have destroyed some really beautiful places and people).

But if you wish to move to TX, leave the Dem/Left politics at whatever State Line you cross as you leave your present State. And, we still pull over (most of us) to help folks broken down, and funeral processions. It is known as courtesy and respect (something that seems to be missing in the "modern" world ... and yes the irony of my above statements are not lost on me).

Actually there is, those further posts are in a different sub.

For instance:

https://www.reddit.com/r/GME/comments/mhyv94/connecting_the_puzzle_pieces_the_failed_bet/?utm_source=share&utm_medium=ios_app&utm_name=iossmf

So your post has credit because someone else wrote a speculating post? Lol what ?it would be quite easy proving your validity without giving up your identity. Nice shit post though

HarrytheMuggle · 2m

For starters, the linked post is not OP's source. OP was the linked post's source. There's a deleted thread from Monday/ Tuesday that was extremely detailed but posed a slightttt Qanon perception so mods removed it which was safe.

However, the detail in the comments....we're reliving the big short but worse

It is Bernie Madoff's prisoner number.

1

1

Reply

Share

...

Rabbadabbingdong · 2m

The OP had a countdown 360.5. Was todays date 360.0?? If this was all connected we're in something so much bigger than we think. *Puts bigger tinfoil hat on** the number was Madoff's prison number, did he have the secret??

The word closeclose is a clue haven't figured it out yet though

Chat

Search

lauden323 · 2m

Could be way, way off track but found Cocolevio of interest. It's on the corner of sixth St and Congress Ave in Austin just next to a university building. Website mentions cloud, big data, Ai, investment in equity ...

After noting the repetition of closeclose and "coco" and scanning the website, I hopped on LinkedIn to look at the founders bio. Harvard, Wharton, Goldman Sachs, ran for Texas State Rep.

That's all I got, takes off tinfoil hat ... maybe not connected in anyway
